MERN FULL STACK DEVELOPER

A dedicated and detail-oriented MERN Stack Developer with hands-on experience in building full-stack web applications using MongoDB, Express.js, React.js, and Node.js. Proficient in developing responsive user interfaces, RESTful APIs, and scalable backend systems. Adept at collaborating in Agile environments, solving real-world problems, and delivering high-quality code. Passionate about continuous learning, clean architecture, and developing impactful digital solutions that improve user experience and business outcomes.

KEY SKILLS

NodeJS	ReactJS	HTML
ExpressJS	NextJS	Css
MongoDB	TypeScript	Bootstrap , Tailwind

PROFESSIONAL EXPERIENCE

IBR INFOTECH

Oct 2024 - Present

MERN STACK DEVELOPER

As a MERN Stack Developer, I have been actively involved in designing, developing, and maintaining full-stack web applications using MongoDB, Express.js, React.js, and Node.js. My responsibilities include building dynamic and responsive front-end interfaces, developing secure and scalable RESTful APIs, integrating third-party services, and managing backend logic. I collaborate closely with cross-functional teams using Agile methodologies to deliver high-quality features on time. I also contribute to code reviews, performance optimizations, and debugging to ensure seamless application performance and user experience.

PROJECTS :-

- **Inventory Management**

I worked on the admin panel of a web application used for managing inventory, pricing, projects, and purchase orders. My main responsibilities included creating user interfaces with React, building and integrating RESTful APIs using Node.js and Express, and managing data between the frontend and backend. I specifically handled modules for managing accessories, which included tracking multiple parts, handling multiple suppliers, and maintaining accurate pricing and stock details. This system helped improve pricing accuracy, reduce stockouts, and speed up order processing.

- **IADM SaaS Platform**

Contributed to the development and maintenance of a next-generation SaaS platform aimed at improving coordination, training, certification, and resource deployment for disaster management. I was responsible for building responsive and user-friendly UI components.

- Developed public-facing pages using Next.js
- Designed and implemented admin dashboard interfaces with React.js, Tailwind CSS, and Bootstrap
- Created and managed key modules like user profiles, organization profiles, feeds, and job pages using React.js
- Focused on clean, reusable UI components and smooth user experience across all devices

- **Other Projects**

Aurora(NextJs) , Cleaning Business , N8N Workflows(AI Automation)

EDUCATION & CERTIFICATIONS

Master Of Computer Application

Sage University , Indore

Bachelor of Computer Science

GDC College , Khandwa
